

The MiniWide-1 is ideal for the use of different digital backs such as Leaf (Valeo 6/11), PhaseOne (H5, H10) MegaVision (S3, S427) and others based on the 24x36 mm sensors.\* The built-in Copal-1 shutter allows for speeds upto 1/400 sec. For backs with a larger sensor such as Leaf Valeo 17/22, PhaseOne H20/P20 and Imacon 96c, a camerabody MW-3 with Copal-3 shutter is available, allowing more image circle covering and speeds upto 1/125 sec.

Accessory shoe for a view finder and a flash mount are standard, spirit levels are integrated.

The optional viewfinder is available with a mask for several focal length perspectives.

The body offers a choice of interfaces for compatibility with either Hasselblad, Contax 645, Mamiya 645 Pro, Mamiya 645 AF(d), Bronica Etrsi or Bronica SQ mounts.

**Specifications:**
